“Healthy Social Relationships” Animatic

We (Aster, Guy, Heidi, Isobel) have been working on progressing past the pitch to prepare for Production and produce our Animatic.

Response to feedback

- In the animatic, we included a couple of examples of people watering others' flowers to represent positive social interactions.
- The animatic features more variety in the characters than previously shown. This includes (but is not limited to): Elderly and young characters, a Queer couple, and a Carer. There is also more variety in the plants.
- The animatic is now accompanied by a scripted voice-over.
- When moving to colour animation, we plan on using lighter backgrounds to ensure the characters are the main focus.

Animatic Context

- The animatic focuses on various social relationships through plants representing people's social needs.
- We will rewrite the script to fit the animation's time frame better.
- Our animation will include more subtle character movements, including flowers blooming and plants changing more than seen in the animatic.
- While many of the characters interact with one another, we felt it was also important to include a character fulfilling their own social needs and tending to their own plant.
- The final film will be animated using 2d digital character puppet rigs.
