

Dear Haslemere Health Centre,

We wish to formally say hello and that we appreciate this opportunity you have presented us as students to put our foot in the door for professional practice within industry parameters.

This Animatic will be a base visualization of how the developing product shall feel and read to viewers. With consideration of previous comments, we have done the outlying aspects of the required title and end cards.

As to our feedback, we haven't put words within the bubbles being burst from the boxer yet, however we shall be making it clear in the finishing animation, and choosing to make the man jogging on the treadmill made to be placed in the end. Representation of culture will be difficult to show in this Animatic, due to it being in Greyscale and simplistic general designs, however we assure that it is being considered.

We look forward to your feedback and hope you have a nice day.

Yours sincerely,

Group L; Brandon-Lee Owen, Max Jenkins ,Riley Fuller and Rouxan Hewtson Le Roux
