

Respective faculty,

Following your feedback, we have refined the drumstick character design to better align with the overall tone and visual language of the film, ensuring it feels warmer and more appropriate within the healthcare context. In addition, we have updated the bean character to include a visible disability, as discussed. This adjustment strengthens the inclusivity of the piece and ensures the family dynamic reflects a broader and more representative community.

We have attached the changes of drumstick and the Animatic.

The Voice Over: Please note that the voices featured in the animatic are temporary scratch recordings intended purely to demonstrate timing, pacing, and dialogue flow. The final film will feature professionally cast character voices alongside a polished voiceover to clearly distinguish narration from character dialogue and elevate the overall production quality.

Regards

Group M2 - Isha, Ruhan, Amaan
